THE OLDER PATIENT: Strategies for Managing Pain
WEBCONFERENCE SEMINAR SERIES

Learning Objectives
After completion of this activity, participants should be able to:

• Identify and translate into clinical practice safe and effective treatment regimens for the older patient.

• Conduct an assessment sufficient to properly detect and diagnose pain and comorbid conditions in the older patient.

• Differentiate typical physical pathologies, functional limitations, and cognitive and psychosocial impairments specific to the various older patient populations.

Target Audience
Neurologists, family physicians, general practitioners, internal medicine specialists, rheumatologists, physical medicine and rehabilitation specialists, nurse practitioners, pharmacists, and other physicians and healthcare professionals who treat patients with pain.

CME/CE Information
